

CODY J. BOILLOT, MBA, CSM

Sr. Technical Program & Product Manager | People, Training & Talent Development Leader | Certified Scrum Master

Orlando, FL • (317) 869-7789 • Boillot.Cody@gmail.com • www.CodyBoillot.com • [LinkedIn](#)

PROFESSIONAL SUMMARY

Technical program and product leader with **15+ years** delivering complex, multi-team software programs and building the people who ship them — including **5+ years owning product vision, roadmaps, requirements, and backlogs** as a Product Owner, internal platform product lead, and SaaS founder. Certified Scrum Master, MBA, and doctoral candidate in Industrial & Organizational Psychology who leads concurrent programs to schedule, budget, and quality; translates customer and business needs into user stories and iterative releases with engineering and QA; and personally runs the full talent lifecycle — recruiting, hiring, structured training, and coaching — that developed **60+ engineers to full independence with 90%+ retention**. Hands-on AI builder and founder of a revenue-producing AI-agent SaaS; negotiated a vendor consolidation delivering **\$5M+ in annual savings**. U.S. Air Force combat veteran who leads with clear priorities, discipline, and trust.

CORE COMPETENCIES

Product: Product Strategy & Roadmap Execution • Requirements, User Stories & Backlog Prioritization • KPI Definition & Product Analytics • Iterative Releases with Engineering & QA • Customer Discovery & Adoption • Product Advocacy & Stakeholder Education

Program & Delivery: Technical Program & Project Management • Schedule, Budget & Quality Ownership • Multi-Team & Dependency Coordination • Risk & Mitigation Planning • Agile / Scrum Leadership (CSM) • Executive Reporting • Vendor & Contract Negotiation • Change Management

People & Talent: People Management & Team Leadership • Full-Cycle Technical Recruiting • Structured Interview Design & Screening • Training Program & Curriculum Design • Onboarding, Coaching & Mentorship • Performance Development & Retention

Technology & AI: Agentic AI Systems & AI-Accelerated Delivery • AWS, React, Node.js, CI/CD • Jira, Confluence, Smartsheet, Miro, Figma

PROFESSIONAL EXPERIENCE

Software Development Engineering Manager / Technical Program Manager 2023 – Present

Sinclair Digital

- Own product direction and delivery for a portfolio of four internal platforms in daily use across a 40+ person engineering organization, carrying each from concept and requirements through launch, adoption, and iteration.
- Lead multiple concurrent technology programs, owning schedule, budget, resourcing, and quality from initiation through closure while reporting progress, milestones, dependencies, and risk to executive leadership.
- Serve as primary liaison between engineering and business stakeholders: gather requirements, translate them into user stories and priorities, ship iterative releases with engineering and QA, and define and monitor KPIs and adoption metrics.
- Manage 16 direct reports across five teams: set priorities, clear blockers, run performance development, and coach engineers into leaders.
- **Own the entire technical hiring funnel:** write job postings, source and make first contact, screen every candidate, design and run structured interview loops, and make the final hiring decision for every engineering hire — accountable for quality of hire, not just time to fill.
- Designed and ran a structured six-month training program that took **60+ engineers from onboarding to full independence with 90%+ retention**, anchored by a gamified learning platform (Training Hub) that targets and closes individual skill gaps.
- Led a vendor consolidation initiative, negotiating contracts to deliver **\$5M+ in annual savings** with zero disruption to operations.
- Drive change management and adoption of new tools and AI-assisted workflows, educating stakeholders through hands-on training and a weekly TED-style speaker series (Tech Talks) I founded that reshaped culture around learning and knowledge-sharing.

Founder & Builder 2024 – Present

LoPro CRM LLC

- Set the product vision and own the roadmap for a revenue-producing SaaS CRM powered by autonomous AI agents, taking it from concept and customer discovery to a live, paying product.

- Run the full product lifecycle: requirements, prioritization, iterative releases, infrastructure, integrations, pricing, go-to-market, and customer onboarding — proving end-to-end delivery of a scalable commercial product.

Product Owner & Engineering Manager 2021 – 2023

Indiana Dept. of Workforce Development

- Served as Product Owner across three teams for large-scale, user-facing platforms serving thousands of users, owning backlogs, user stories, sprint ceremonies, and cross-functional dependencies against cost and schedule targets in a compliance-driven public-sector environment.
- Improved operational reliability and release predictability by 35% through process improvements and structured accountability.

Software Development Engineer & Scrum Master 2020 – 2021

Sallie Mae

- Hired directly by the client following contract-to-hire conversion; delivered enterprise applications and automated business workflows in a regulated financial-services environment while coaching teams on Agile best practices and consistent delivery cadence as Scrum Master.

Software Developer (Consultant) 2018 – 2019

Cognizant Technology Solutions — Client: Sallie Mae

- Built enterprise applications to client quality standards inside Cognizant's onshore delivery model, coordinating with distributed delivery teams; performance earned direct conversion to full-time client employee.

Senior Operations & Sales Manager 2010 – 2018

Angi & Others (Consumer Services)

- Managed site-level operations for consumer-facing services businesses and built training programs that measurably accelerated team productivity and engagement across multiple business units and locations.

Combat Sergeant & Aviator 2001 – 2010

U.S. Air Force

- Deployed multiple times across two wars in Iraq and Afghanistan, leading airmen in active war-zone operations with responsibility for training, safety, performance, and morale under sustained pressure. Airman Leadership School graduate; held Top Secret/SCI clearance (expired, readily renewable).

PRODUCTS, PLATFORMS & TECHNICAL SKILLS

- **Training Hub** — Gamified skill-development platform using badges and achievements to close individual skill gaps; backbone of the 60+ engineer development program.
- **SkillTrainer** — Public skill-tree training engine with tiered modules, media, and a full quiz builder — authored entirely in the browser (live demo at CodyBoillot.com).
- **DaaS (Development as a Service)** — Streamlined delivery-management platform (a faster alternative to Jira) launched on AWS, serving 100+ daily users with defined service standards and adoption metrics.
- **Deploy Genie** — Self-service deployment platform standing up SSO-secured AWS applications with custom URLs, turning a manual, engineering-gated process into a few-click workflow.
- **Vibe Genie** — AI platform that generates working applications from natural-language prompts for engineers and non-engineers alike.

Product & Delivery: Jira, Confluence, Smartsheet, Airtable, Miro, Figma; Agile/Scrum; KPI dashboards; risk & change management

Engineering: AWS, React, Node.js, REST APIs, CI/CD, SQL, SSO integration

AI: Agentic AI systems, Claude Code, Cursor, Codex, n8n, custom AI platforms built in-house

People & Analytics: Structured interviews, screening rubrics, curriculum design, retention programs, workforce analytics

EDUCATION & CERTIFICATIONS

- Doctoral Candidate, Industrial & Organizational Psychology (expected 2026), Touro University — graduate study in personnel selection, assessment, training, and retention
- Master of Business Administration (MBA), University of Phoenix
- Bachelor of Arts, Political Science, University at Buffalo
- Certified Scrum Master (CSM) • Project Management Professional (PMP) — in progress
